Handmade Ceramic Tiles

Handmade ceramics require a lengthy production procedure. Hand labor is used for every stage of production, including kneading the clay and glazing. Each pottery that is produced after this difficult and prolonged procedure is a one-of-a-kind piece of art. Our handcrafted ceramics give far more value than ordinary products to your projects and living areas.

Handmade Mosaic Tiles

Our mosaic tiles are manufactured of porcelain and fired at 1180-1200 degrees. That makes them suitable to be used in walls, floors, swimming pools, indoor and outdoor. Their 30x30cm mesh feature makes them very simple to apply.
